
Marker | Meaning
* before a column | Primary key
+PK+ | Primary key (composite pivots; multiple per entity)
+FK+ | Foreign key — verified against KEY_COLUMN_USAGE, not MySQL's MUL alone
+unique+ | UNIQUE constraint
+nullable+ | Column allows NULL
Connector | Meaning
one (required) to many (optional) — standard 1:N, FK not nullable
one (optional) to many (optional) — 1:N, FK nullable
one to zero-or-one — 1:1, FK unique and nullable
many to many, drawn as two 1:N legs into the pivot table between them
